

Baby Thermal Ceiling Type BTC

The limited ability of the infant's to maintain and control its own body heat, make adequate heat supply necessary to avoid unexpected complications. The Aragona® Baby Thermal Ceiling type BTC, actively supports infants with energy and eliminates discomfort on the nursing table. "Soft radiant heat", from the BTC is easily absorbed and utilised by infants. The BTC is furnished with fluorescent light, which gives good illumination and enables enhanced nursing. Two switches and an infinitely variable control for the heat distribution are all it takes to operate the BTC. All of the energy is directed towards the infant and room temperature is maintained at normal. Installation is very easy and straightforward. The BTC can be suspended by wall brackets or chains, depending on circumstances. A wallplug connection means that electrical installation is very easy to perform.

Technical data:

Power supply: Cord with
Plug 120-240V/50/60Hz
Power cons: 400-430W
Class: 1
Radiant heath: at 7300-8500 Nanometre
Length: 900mm
Width: 400mm
Height: 80mm
Weight: 12kg
Light: 2x11W fluorescent tubes
At 3500°K

Made in Sweden
